Dep. County Surveyor

Scale 1 in. = 200 ft.

Did not arrive until nearly noon as interurbans was broken down and trains were late. Was driven in by rain on the first day. A. C. Gelland and Wade Connelly acted as channemen after being duly sworn. Found no stones or marks around additions either on section lines or addition lines that were standing at the time additions was laid out. Located section line on the South and located South line of additions from it. From records found the York and Wilson add to be definitely tied to the old town. Located lines in old town by starting at the old Court house and located the East line of York and Wilsons Add from this line as shown by plat.

Locate the line on Locust Street West of the York and Wilsons add from the Section lines on the South and the (1/4) quarter line and the East. Mode of procedure shown correctly by accompanying plat.
